CONTENTS

OCTOBER 1983 VOL. 8 NO. 10

FEATURES

The Hypothermic Code 32
Reduced metabolic demands for oxygen in the severely hypothermic patient make it difficult to determine if there is an absence of pulse and respirations. As a result of this difficulty, there is a controversy over whether or not CPR should be administered to the severely hypothermic patient. —by *Cmdr. Alan Steinman, MD*

ARC Answers Alicia 36
The first major hurricane to threaten the Texas coast in 22 years took 17 lives and caused the evacuation of over 20,000 people —by *Bill Barron and Bobby Allred*

EMS Volunteers 41
An analysis of the potential of volunteer systems in the '80s —by *Peter Lucash*

Pitfalls in Disaster Management 46
Common problems in disaster management are defined in terms of four basic pitfalls —by *Ameen Ramzy, MD and Lt. Gary Warren*

Simulation in Training 48
Realism in training enhances the response capabilities of students. Techniques for simulating injuries are presented —by *Frank Dawson*

jems 1983 Bookstore 51
A master list of books currently in print for EMTs and paramedics as well as a list of those to be released in 1984 —*Staff Report*
