JOURNAL OF EMERGENCY MEDICAL SERVICES

SPECIAL ISSUE

EMS AT WORK

- The Ideal System
- The Employer's Duty
- Five Case Studies
- Response in the Sky(scraper)
- The Hard Facts

CONTENTS

OCTOBER 1984 VOL. 9 NO. 10

Features

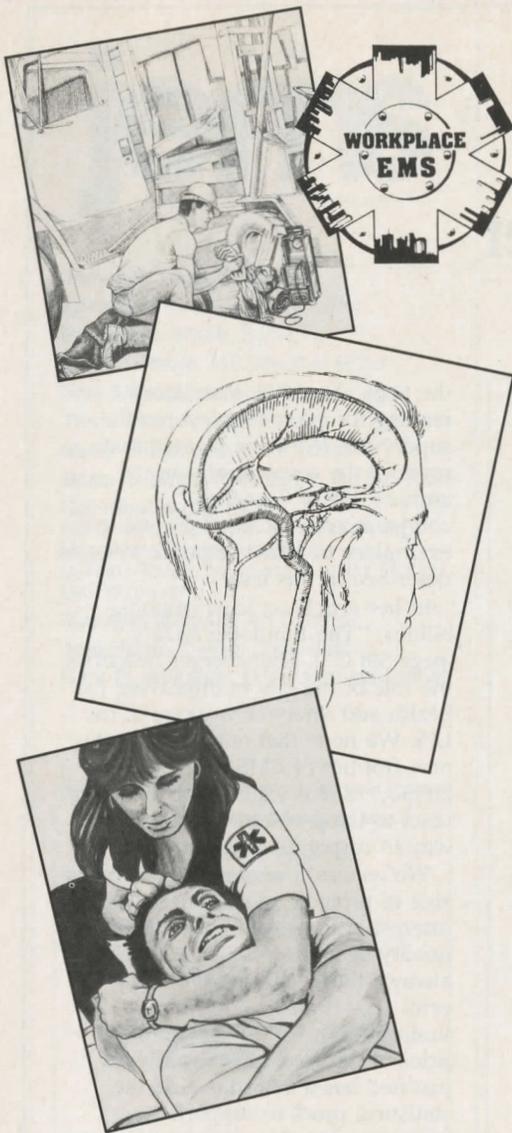

- 34 **The Ideal System** BY LARRY M. STARR AND STEVE WAYMASTER. Geographical isolation, autonomy and defined hierarchial structures make emergency response in the workplace unique.
- 39 **The Employer's Duty** BY CAROL J. SHANABERGER. Under two theories of law, the employer has a duty to provide medical assistance to an employee who becomes ill or injured on the job.
- 42 **Case Studies** BY MARY NEWMAN. The experiences of others serve as valuable tools in developing in-house emergency response systems. Five case studies illustrate the possible configurations and successes.
- 44 **The Urban "Small Community"** BY KATE DERNOCOEUR. The Health Emergency Life-Support Program (H.E.L.P.) designs in-house first response for a medical emergency in a vertical high-rise.
- 55 **jems 1984 Bookstore** A comprehensive guide to books in print or soon to be released.
- 60 **CPR Goes to Work** STAFF REPORT. A savings of lives and of money, improved employee morale and productivity, and an improved public image help sell in-house CPR programs to management.
- 62 **The Hard Facts** Statistics from the National Safety Council show the extent and economic effect of illness and injury in the workplace.
- 69 **Eye Care, Back to Basics** BY WILLIAM GARCIA. Even those irritating minor eye problems, if left untreated, can lead to major complications.
- 72 **Brain Resuscitation** BY MARVIN L. BIRNBAUM, MD. The most recent evidence clearly indicates that the brain does not sustain irreversible injury within four to six minutes of circulatory arrest.
- 78 **Surveying the Gender Gap, Part 2: Attitudes on Women in EMS** BY KATE DERNOCOEUR. The second of the three-part series based on an original *jems* survey.
