Features

- 28 Getting a Computer for Your EMS** BY MICHAEL FRANK, MD. While this first installment of a three-part series is not an encyclopedic approach to computer applications, and will not tell you everything you need to know about personal computers, it will set you on the right track and help you avoid making mistakes that could be costly in the long run.
- 32 Computer Applications** BY JANET BRADFORD. This survey of some EMS systems presently using computers in their daily routines points up the fact that innovative applications of computer technology have been made in emergency management.
- 44 Why Traction** BY ANTHONY G. BORSCHNECK, MD. Prehospital care professionals are reminded that the purpose of traction is to align the fragments, relieve pain, prevent damage to nerve or vascular structures and minimize blood loss.
