JOURNAL OF EMERGENCY MEDICAL SERVICES

Two-Wheeled Trauma

Window to the Brain

Children in Crisis

Special Report: Mexico City

CONTENTS

NOVEMBER 1985 VOL. 10, NO. 11

Features

- 28 **Motorcycle Accidents** BY GLENN H. LUEDTKE. Because of the mechanisms of injury and forces involved, motorcycle accidents cannot be regarded as typical motor vehicle accidents. The motorcycle itself presents its own unique hazards to both rider and passenger, as well as to the rescuer.
- 32 **Child Abuse** BY RICK MILLER, MD. Emergency medicine has long been the leader in the early recognition of the abused child. The present status of identifying and reporting child abuse is reviewed, as well as outlining a course of action that may guide concerned professionals when suspected abuse is encountered.
- 39 **Children in Crisis** BY ATLE DYREGROV, PHD. Although basic survival needs take priority over psychological needs in times of crisis, there is an increasing interest in the effects of stress on children during natural and man-made tragedies.
- 44 **Accidental Hypothermia** BY WILLIAM M. BRYANT. Accidental hypothermia is the result of either a decrease in heat production, an increase in heat loss, or a combination of the two factors. This article reviews a variety of techniques for rewarming and saving the hypothermic patient.
- 49 **A Window to the Brain** BY STEPHEN S. SOLOMON, OD. Of all the primary survey tests done on an emergency prehospital basis, among the least understood are pupil evaluations to ascertain central nervous system trauma. A closer look is taken at what the pupil teaches.
- 52 **EMS Performance Management** BY TERRY SMITH. With all the awareness of computers and their applications, few applications are directly related to EMS. Two relatively unique areas where the low-cost computer technology can be applied to EMS with considerable advantages have been found.

Departments

- 4 **Editorial** – EMS After the Feds 54 **Ad Index**
- 5 **Guest Comment** – The Public Utility Concept by Thom Dick and a response from Jack Stout 60 **Special Report** – Disaster in Mexico City by Ron St. Germain
- 7 **Letters** – Why Traction?; Vaccination Programs Should be Epidemic, Not Endemic; Misplaced EMT of the Year; Goat Ventilation; CPR Telephone Triaged; FDA Battery Recall; Updates and Corrections 64 **Inroads** – Lockable Flow Meter; New Type II From Bluestar; Supercharged Communications Batteries; Fully Automatic EKG Recorder; New Holster For Athletic Trainers; Backlit Push-Button Encoder; New Collar From Morrison; Full-Line of Oxygen Equipment; Silver Eagle Modular
- 14 **Calendar**
- 19 **Inside EMS** – Motown EMS Off Hook in Death Case; Military-Civilian Officials Conduct Disaster Drill; Wars Continue; EMTs Fired in Failure to Check Pulse; Ordinances Linked to Snow Shovel Deaths 69 **In The Industry** – Garry L. Briese/International Association of Fire Chiefs; Elder Oxygen Company; Acadian Ambulance Service; American Academy of Orthopedic Surgeons; Hale Fire Pump Co.; Morrison Medical Products; Allied Healthcare Products
- 54 **Classifieds**

Columns

- 20 **Around the Nation** by Dana Jarvis – DuPont Answers Paint Scare Story; "Closest Hospital" Saves Trauma Victim; Which Phone Company Charges for Emergency Response?
- 26 **Tricks of the Trade** by Thom Dick – Gorillas, Putting Class In Your Act
- 66 **Innovations** by Thom Dick – Tonka Tough; Switch That O₂
