Seeking Approval for the Antishock Garment by Scott Bourn and Mike Taigman

34

What's the final word on antishock trousers? The history of research on these devices is presented as a hypothetical attempt to gain approval from the fictitious Federal Equipment Administration.

There's Still Hope for PASG by Steven R. Hawks

39

Cardiogenic Shock: A Case of Body Power Failure (CEU Article) by Scott Bourn

42

Although cardiogenic shock is seen less frequently in the field than other types of shock, it is essential that prehospital professionals have the ability to recognize and aggressively treat its victims.

Defibrillation Shakes the Nation: Results of the JEMS 1988 National Early Defibrillation Study

50

by Mary Newman

Ten years ago, only paramedics, physicians and nurses could defibrillate cardiac-arrest patients in the field. The tremendous growth of EMT-D programs indicated by this study shows that the landscape has changed.

Advice From EMS Directors in States With Early Defibrillation Program Experience.

59

Physician Intervention at the Scene—Another Point of View by Arno Vosk, MD

60

The presence of a physician at the scene of an emergency is often viewed cautiously by EMTs. This is an inside look at physician intervention that promotes better communication.
