JOURNAL OF EMERGENCY MEDICAL SERVICES

**Hyperventilation:
A Breath of Fresh Air**

**Controlling the
Maddening Crowd**

A dramatic, low-key photograph with a dark background and a strong red and orange light source from the right. In the foreground on the left, a man in a light-colored uniform is shown in profile, looking towards the right. On the right side of the image, an elderly person is seated in a wheelchair, also looking towards the right. The lighting creates a somber and contemplative mood.

**Seeing
The Elderly
In a New Light**

FEATURES

34 Reflections on Aging: Communicating with Elderly Patients

BY JUDY JANING, BSN, EMT-P

Like it or not, many of our attitudes about aging are based on our personal experiences with elderly people. Yet providers need to replace myths and stereotypes with an understanding of the cultural and socioeconomic factors at play when communicating with this burgeoning patient population.

44 Emphasizing the Elderly in the New EMT Curriculum

BY DAVE SAMUELS, MHA

45 Linking the Elderly to Community Services

BY LOWELL W. GERSON, ROGER HOOVER, SAM McCOY AND BARBARA PALMISANO

Sometimes, the only contact elderly patients have with outside medical services is through the EMS network. Find out how one city uses prehospital providers to link these patients with community services tailored to their needs.

50 Explosive Emergencies: Treating Blast Injuries in the Field

BY THOMAS P. BUTCHER JR., RN, MPH, REMT-P

As the incidence of blast injuries from chemical and industrial explosions rises, prehospital providers need to know how these injuries are treated differently from other forms of trauma.

60 Bystander Intervention: Help or Hindrance?

BY BRUCE WALZ, PHD, NREMT-P

Rubbernecks, lookie-loos, gawkers: Are they the bane of your existence, or can they be used to your advantage at the scene? And what makes them tick?

66 Emergency in the Clouds

BY KAREN HILL LESS, MED, REMT-P

With more than 1,000 medical emergencies occurring each year on domestic flights, the chances of being called upon to assist one of these victims is soaring. What resources are available to health-care providers 35,000 feet in the air?

68 Recommendations for EMS Travelers

BY KAREN HILL LESS, MED, REMT-P

70 Taking EMS to New Heights

BY GRACE H. LEE

78 One Size Doesn't Fit All: Choosing Pediatric Equipment: Part I

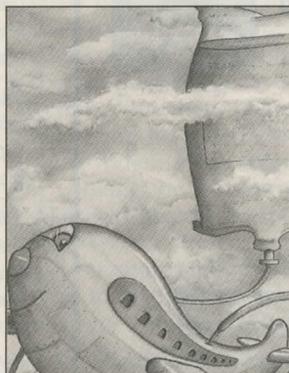

BY LARRY B. MELLUCK, MD, AND BRENT H. DIERKING, BS, REMT-P

Recent studies suggest that half the battle in treating pediatric patients is having access to the proper equipment. This article, the first in a two-part series, describes the factors to consider in selecting pediatric equipment for the prehospital setting.

83 A Matter of Life and Breath: Prehospital Treatment of Hyperventilation (CEU Article)

BY MIKE SMITH, REMT-P, AND NANCY SEALBY, RRT, BHS, MED

With its ability to mimic the signs and symptoms of countless other conditions, acute hyperventilation can often go undetected in the field—with deadly consequences.
