CONTENTS

AUGUST 1986 VOL.11 NO.8

Features

- 30 **Motor Vehicle Trauma Injury Prevention** by KATHRYN D. HOFFMAN, EMTA, MS, ED., DALE L. KEMMERER, MD AND JEANNE O'BRIEN, RN. The types of injuries in a vehicle, the roles and responsibilities of the EMT in trauma prevention, and the myths and facts about seat belt usage are presented.
- 34 **Ambulance Bypass** BY JOHN A. MACKEY, MD. While most studies focus on the overuse of ambulances for non-emergencies, little is known about underutilization of emergency services, where serious injuries arrive at the emergency departments by private vehicle.
- 38 **Cardiology Practicum** BY MIKE TAIGMAN AND SYD CANAN. An advanced approach to EKG interpretation can be rewarding to the EMT and beneficial to the patient.
- 40 **The Hysteria Threshold, Gaining Control of the Emergency Caller** BY JEFFREY J. CLAWSON, MD. Avoiding the natural inclination to hang up is the first action to take, but there are more ways to gain the upper hand with an hysterical caller.
- 43 **IV Line Placement, A time study for prehospital providers** BY RICHARD FELDMAN, REMT-P. Does it really take 11 minutes to start an IV line? Only a stopwatch in the field would answer the question in this study.
