## Features

- 26 Making EMT-D Work** BY RICHARD O. CUMMINS, MD, ET AL. The national standards and course functions for EMT-defibrillation programs are discussed by physicians, nurses and paramedics.
- 34 Common Errors in Mass Casualty Management** BY GARY P. MORRIS. Mass casualty incidents provide valuable lessons for the prehospital provider. A re-evaluation of large-scale rescue operations exposes common weaknesses and errors. Guidelines for more effective incident management are identified.
- 39 Major Responses of 1985: A Pictorial Review** BY RON ST. GERMAIN. A review of the major responses of 1985 may help us prepare for the unexpected in 1986.
- 43 Inexpensive Moulage** BY CASIE WILLIAMS, RN AND SHERRIE COTTON. Techniques used to provide realism in an artificial situation are called moulage. A variety of materials may be used to create the illusion, however, techniques that primarily utilize inexpensive materials are described.
- 47 First Aid for LIVE AID** BY JOHN P. MARIANO. The Live Aid concert attracted a crowd of 90,000. Routine preliminary procedures were followed, but much planning had to be executed to ensure that this mass gathering did not turn into a mass casualty incident.
