CONTENTS

JUNE 1983 VOL. 8 NO. 6

FEATURES

**Toxic Fire Gases:
 Treating the Victim of Smoke Inhalation** 24
 Eighty percent of all fire fatalities and injuries are due to smoke inhalation; reviewed are the hazards and treatment for carbon monoxide and two lesser known but major toxic fire gases, hydrogen chloride and hydrogen cyanide—*by Michael F. Olsen*

The Ambulance Report as Legal Document 29
 The ambulance run report is the written history of a call, and may be the best, if not the only, source of factual information if legal proceedings are ever initiated—*by Peter B. King*

**Championship Mania:
 Testing an Interagency Command Operation** 33
 The wild street celebration following the 1982 national basketball championship provided the small town of Chapel Hill, North Carolina with a unique test of its emergency preparedness and interagency command operation—*by Herb Garrison and Thomas R. Griggs, MD*

**Financial Strategies for Surviving the '80s:
 Part 4: Cost Control** 00
 In the final segment of the series, the author explains how to keep your service cost efficient while maintaining high performance ALS and closely monitored response times—*by Alan Jameson*
