QUICK FIND THE AMBULANCE IN THIS PICTURE

6:00pm. An urgent call comes in. You check the digital map on your PC and find the closest available ambulance. You type in the address and data dispatch sends it to your closest driver. In seconds they're on their way. Reliable. Secure. Your driver doesn't have to fight to hear you over traffic, it's right in front of him on the Mobile Data Computer (MDC) screen. At the patient's house a function key on the MDC automatically time-stamps arrival and departure. No messy paperwork at the office.

Our MDC offers two-way messaging, integrated GPS, an 8-line graphical screen, PCMCIA slot, smart card/magnetic stripe reader and covert microphone. Call today and let us find all the ways mobile data/GPS can optimize your ambulance operations.
